- Global Engineering Network

about us

The establishment of Zamil Steel Vietnam (ZSV) in 1997, brings together a joint venture between Zamil Industrial Investment Co. (ZIIC), an International manufacturing and fabrication group, with Japan's trading giant, Mitsui & Co.,

Serving the buoyant Vietnamese and Asia Pacific Markets, ZSV has grown through sustained success, to become the premier Steel Buildings and Steel Structures supplier in Asia Pacific. With two state-of-the art manufacturing facilities in Vietnam, supported by 14 area sales offices in 10 regional countries, ZSV ensures top quality products which is reflected by our continuous customers' satisfaction by leveraging on our global corporate experience in both design and fabricating of over 70,000 steel buildings across the world. ZSV is also a part of an extensive network of Zamil Steel Global Group that consists of 11 manufacturing facilities, 8 engineering offices and 53 area sales offices worldwide.

North Vietnam - Hanoi Plant

located in Noi Bai Industrial Zone, Hanoi, Vietnam

Constructed in 1997, this plant specializes in the fabrication of pre-engineered steel buildings and heavy structural steel products.

Total Area: 41,200 m²

Fabrication Capacity:
5,000 metric tons (MT) per month

South Vietnam - Dong Nai Plant

located in Amata Industrial Zone, Dong Nai, Vietnam

Inaugurated in 2008, this new plant possesses the most up-to-date cutting-edge technologies and modern machinery for the fabrication of pre-engineered buildings and complex steel structures.

Total Area: 45,150 m²

Fabrication Capacity:
4,500 metric tons (MT) per month

products

consultancy • design • fabricate • supply • install

Pre-engineered steel buildings

Customized steel buildings are tailor-made to user's architecture and engineering requirements. Maximum efficiency can be achieved using built-up members that are tapered in accordance to calculated stress limits which optimizes the use of materials and eliminates the restrictions and wastage of standard stocked I and H beams. These often reduce the design tonnage up to 30%. Pre-engineered Buildings are most suitable and economical for low rise buildings spanning up to 100 meters with eave heights up to 30 meters.

Structural steel

A diversified product line of ZSV that fabricates structural steel and plate works for various heavy industrial and commercial applications. With an excellent track record in structural steel fabrication for over two decades in the Middle East, Zamil Steel extended its structural steel fabrication division to Vietnam in 2008 targeting the highly potential industrial prosperity in Vietnam and the Asia Pacific region. ZSV's Structural Steel fabrication is controlled by state-of-the-art Computer Numerical Coded (CNC) equipment; it also utilizes the latest Engineering software for detailing & connection design.

MaxSEAM® roof system

The Zamil Steel MaxSEAM® roof system is one of the strongest and most weather-tight standing seam roof systems available in the industry today.

The product features a 360-degree seam along the side laps of the panels; a special type of sliding clip and a carefully engineered system for improving strength, durability and resistance to weather.

The roof system is the most recommended roof system for tropical, rainy, snowy or high wind (cyclonic) regions.

- Pre-engineered steel buildings applications: Factories, Warehouses, Aircraft hangars, Supermarkets, Schools, etc.
- Structural Steel applications: Plants (Power, Oil & Gas, etc.), High-rise buildings, Airports, Any types of steel structures

ZAMIL STEEL

global experience, local solution

Engineering Expertise

Our in-house engineering groups at Zamil Steel Vietnam are a part of the ZS Global Engineering Network which consists of 8 offices located in 4 different countries with two offices located in Vietnam (Hanoi and HCMC). Leveraging on the experience of supplying more than 70,000 steel buildings to over 95 countries worldwide, we have the ability to design to international codes and customize the best solution to meet your functional and architectural requirements. Furthermore, our experienced and professional engineers at ZSV utilize up-to-date software to design and detail every steel building in order to achieve maximum cost efficiency for the supply of all our steel buildings.

Manufacturing Excellence

Our manufacturing facilities, which rank among the most advanced in Asia Pacific, are supported by over 40 years of industrial experience and world-wide technical capabilities. With high-tech equipment, well-trained employees and experienced management, our production efficiency is unparalleled.

Whether your building is in Vietnam, Indonesia, Japan or elsewhere in Asia Pacific, our strong stock hold of raw materials and manufacturing capabilities ensures top quality finished products at timely deliveries.

Seamless Quality Assurance

At Zamil Steel Vietnam, stringent quality control procedures are maintained in order to ensure the utmost consistency in the quality of "Made by Zamil Steel" products. The Quality Control Department at Zamil Steel Vietnam has the best engineers, tools and facilities to conduct the quality assurance control in accordance with international standards and best practices.
